

**Amendments to the Specification:**

Please amend paragraph [0016] as follows:

**[0016]** In a further embodiment these devices are advantageously assembled in a single packaged circuit. Thus, at least some of the additional sensors, the calculator and the invention-related sensor device form a compact, [[are]] standardized and therefore low cost telematics platform. In addition to the invention-related sensor device the platform comprises the in-vehicle component of a centrally based navigation and management system and/or the road impact fee calculator.
